Raúl Cancela Martín

AI-Augmented Engineer & Cloud Automation Architect

AI Orchestration (Gemini, Claude, DeepSeek) · Cloud Architecture & Hybrid Environments · Enterprise Automation with GAM & Python

Madrid, Spain (Remote) arulcancela@gmail.com +34 625 731 263 linkedin.com/in/arulcancela

PROFESSIONAL SUMMARY

Physicist by training and natural builder. My specialty is not memorizing syntax or writing boilerplate code from scratch, but **orchestrating Artificial Intelligence** (Gemini, DeepSeek, Claude, ChatGPT) and agentic environments to **design, build, and deploy complex technological solutions at unprecedented velocity**. I define myself as an **AI-Augmented Engineer**.

I bring **15 years of experience** across Cloud infrastructures, hybrid environments, and Enterprise migrations (with extensive background in **Google Workspace, Microsoft 365, and GCP**). My scientific foundation in Applied Physics grants me strong abstraction skills to quickly understand the core logic of any system and **adapt flexibly to new technology environments, cloud platforms, or software stacks**.

My true differentiator lies in **AI-augmented development** applied to high-impact automations in **GAM and Python**: I understand the architecture, guide AI with logical rigor, and **iteratively validate code with automated testing** to ensure production-grade robustness.

On the *maker* side, I maintain my own infrastructure: local LLMs via **Ollama** (strict privacy), AI agents via API, trading bots, and advanced home automation (**Home Assistant on Raspberry Pi with Pi-hole**). I seek remote challenges to apply this *Augmented Engineer* philosophy: using AI to multiply operational efficiency, solve architectural challenges, and automate processes across any ecosystem.

Availability: Immediate · Remote (preferred), flexible hybrid in Madrid, or occasional travel. Full-time, part-time, or freelance/contractor (B2B).

FEATURED PROJECTS (VERIFIABLE PORTFOLIO)

Complete, verifiable portfolio at **github.com/arulcancela** — 7 repositories, all with Continuous Integration (CI) and automated tests.

workspace-tenant-auditor — GitHub →

Security Audit for Google Workspace

CLI tool auditing tenant security posture across 12 checks (2FA, superadmins, external Drive, third-party OAuth, stale accounts...), prioritizing by severity and generating HTML/PDF/JSON reports.

- **60 automated tests** · 78% code coverage · GitHub Actions CI.
- Layered architecture with least-privilege read-only auth and Docker.

Python · Admin SDK · Reports API · Docker · CI/CD

linkedin-job-hunter — GitHub →

AI-Powered Job Search & Evaluation

Autonomous system discovering job postings, quantitatively evaluating them against configurable profiles via LLMs, calculating fit score (0–100), and compiling customized outreach dossiers.

- AI evaluation, skill gap detection, and Notion/Telegram alerts.
- **16 tests** with CI and PII-scrubbing validation.

Python · Pydantic · LLM (Gemini/DeepSeek) · APIs · CI/CD

url-shortener — GitHub →

URL Shortener with Real-Time Analytics

Full-stack web application with authentication, real-time click analytics, QR code generator, and distributed rate limiting. Deployed to production.

- **41 unit tests** + end-to-end tests (Playwright).
- Decoupled architecture with serverless-testable business logic.

Next.js 14 · TypeScript · Prisma · PostgreSQL · Vercel · CI

agente-deepseek — GitHub →

Autonomous Linux Administration Agent

System agent managing Linux environments via natural language with secure-by-default architecture: categorizes actions, blocks destructive commands, and validates chained syntax.

- Custom security module preventing destructive command injection.
- **18 automated tests** covering validator and config in CI.

Python · DeepSeek API · Rich · Pytest · CI/CD

CORE SKILLS & TECH STACK

AI Orchestration & Agentic Tooling

Agentic workflows and AI-assisted development, advanced Prompt Chaining, iterative AI-coding, frontier APIs (Gemini, DeepSeek, Claude, OpenAI), RAG, multi-agent architectures.

Cloud Architecture & Hybrid Environments

Scalable cloud design, Office 365 / Google Workspace / GCP coexistence (IAM, BigQuery, Directory Sync), tenant administration, DLP & security. Adaptable to AWS, Azure, Linux.

AI-Driven Automation (Vibe Coding)

GAM (Google Apps Manager) and Python via AI-assisted development with analytical verification. REST APIs (FastAPI, Flask), web scraping, and automation across any stack.

Maker Lab, L4 Support & Methodology

Local LLMs via Ollama, API agents, Raspberry Pi, Home Assistant IoT, Pi-hole. Google L4 critical escalations (delegated Superadmin), enterprise SLAs, Jira. Bilingual (Native Spanish / C1 English).

PROFESSIONAL EXPERIENCE

Volkswagen Group Services Iberia

Apr 2026 – Oct 2026 · Remote

Google Workspace Architect & Migration Lead

- **Cloud Strategy:** Technical leadership of the hybrid coexistence strategy between Microsoft Office 365 and Google Workspace across the global corporate workforce.
- **Discovery & Change Management:** Directed the Discovery phase, including regulatory compliance auditing, tenant governance policy formulation, and user migration roadmap design.
- **AI-Accelerated Technical Research:** Daily use of frontier LLMs (specifically Gemini) as core tools to research, assimilate complex protocols, and generate exhaustive technical documentation in record time.
- **AI-Assisted Automation Engineering (AI-Coding):** Directed, generated, and iteratively tested AI-synthesized scripts and custom automation tools to ensure seamless cross-platform coexistence, dramatically compressing delivery timelines without traditional software development overhead.

Independent Consulting & Automation

Sep 2019 – Present · Madrid / Remote

Automation Developer & Cloud Consultant (Freelance)

- **Alcampo / Sabeco:** Developed a bespoke national workforce scheduling solution using smart templates and advanced Google Apps Script algorithms (AI-assisted) to automate shift planning and compliance across hypermarkets throughout Spain.
- **ByMotors:** Digital process optimization consulting, corporate workflow redesign, and automated executive reporting systems via Google Sheets and cloud integrations.

Inetum

Oct 2025 – Apr 2026 · Madrid, Spain

Google Workspace Solutions Architect

- **Migration Lead:** End-to-end execution of a mission-critical migration of 2,000 corporate users to Google Workspace with zero operational downtime.
- **Advanced Automation:** Leveraged deep GAM expertise for massive data extraction and Python scripting for automated user provisioning, surpassing native console limitations.
- **Enterprise Architecture:** Designed resilient, modular, and secure cloud architectures for enterprise client engagements.

Devoteam

May 2021 – Sep 2025 · Remote

Team Lead & Senior Support Engineer (L4)

- **Global Enterprise Support:** Provided high-tier bilingual L4 technical support across a distributed portfolio of 200+ international enterprise accounts.
- **L4 Expert Engineering:** Handled critical incident escalations directly with Google Engineering, operating with delegated Superadmin authority.
- **Quality & Tools:** Streamlined incident workflows via Jira Service Desk and Freshdesk, consistently achieving top customer satisfaction ratings (CSAT).
- **Leadership:** Mentored and led a technical team of 10 support engineers, ensuring strict SLA compliance and continuous technical excellence.

Nubalia

Apr 2019 – May 2021 · Madrid, Spain

Senior Operations Engineer & LumApps Specialist

- **Change Management:** Formulated and delivered comprehensive technical training programs and strategic communication plans to ensure smooth enterprise cloud adoption.
- **Presales Consulting:** Provided technical advisory support to sales teams, drafting technical scopes of work (SOW) and architectural value propositions for enterprise prospects.
- **Intranet Subject Matter Expert:** Lead technical reference for LumApps intranet deployment and deep integration with Google Workspace, handling complex escalations and direct vendor relations.

Intelligence Partner (The Cloud Consulting Company)

Nov 2017 – Apr 2019 · Madrid, Spain

Operations Engineer & Presales Consultant

- **Technical Migrations:** Executed large-scale cloud data migrations for tier-1 enterprise clients, guaranteeing absolute data integrity and zero data loss.
- **360° Consulting Lifecycle:** Managed end-to-end customer lifecycles: presales requirements scoping → migration architecture → user training → post-go-live stabilization.
- **Specialized Training:** Traveled on-site to corporate headquarters across Spain delivering tailored workshops for IT administrators and technical teams.

Grupo MASMOVIL

Sep 2017 – Nov 2017 · Madrid, Spain

Data Analyst

- Advanced data modeling and corporate executive reporting through high-level Excel analytics.

Accenture España

Nov 2015 – Mar 2017 · Madrid / Riyadh, Saudi Arabia

IT Consultant (International Project)

- **International Experience (Riyadh):** Comparative software research and technical drafting of tender proposals and evaluations (RFIs / RFPs).
- **PMO Management:** Project management office control, milestone tracking, and financial reporting utilizing the Office 365 ecosystem.

Institute of Ceramics and Glass (CSIC)

Jun 2014 – Sep 2014 · Madrid, Spain

Laboratory Technician (Internship)

- Synthesis and characterization of composite materials via high-energy ball milling, XRD diffraction, SEM electron microscopy, and VSM magnetometry.

EDUCATION

Universidad Complutense de Madrid

Bachelor's Degree in Physics (Applied & Computational Physics)

2011 – 2015 · Madrid, Spain

Rigorous analytical foundation in quantitative modeling, dynamical systems, and structured problem solving.

CERTIFICATIONS & LANGUAGES

- **Google Cloud Platform:** Big Data and Machine Learning Fundamentals
- **LumApps:** LumApps Deployment Level 1
- **Atmospheric Physics:** Training in Meteorology (Chaotic Systems)
- **Languages:** Spanish (Native) · English (C1 Full Professional)
